

# Feature Cards Carousel

As a user, I want clear options to either delve deeper into their brand story or immediately browse their products, so that I can navigate the site according to my preference.

Jira: [CC-6: Feature cards carousel](#) DONE

## Acceptance Criteria:

- User shall view the main headline (Ex: "Our Products Is Driven By Our Consumers") prominently displayed.
- A concise descriptive paragraph explains Bibigo's philosophy and offerings.
- Multiple distinct "cards" or callout sections are present below the Description
- ~~On click of the card, the card is selected and its respective image is displayed in the center~~
- By default, the first card with its image shall be in selected state
- When the card is hovered or selected, the card size increases an description is visible
  - e.g., "Rooted in tradition, made for the world..."
- Each card has a unique icon/logo representing a specific brand aspect (e.g., "bibi mmm" for authenticity, "World" for global reach, "KOREAN STREET FOOD STYLE" for a specific category).
- Each card has a concise title or phrase summarizing that aspect (e.g., "Authentic Korean Flavours," "From Korea, With Love," "Champion of Korean Street Food").

## Scenarios:

User type: Site Visitor (Guest User)

|   | Given                       | When                             | Then                                                                                                                                                                                                                                 |
